

As a full UBCP/ACTRA member since 1994 and current board director, I am seeking re-election to continue to serve the membership. It is crucial that women and members of equity seeking groups are represented at the upper level of our leadership. Four of our experienced female board members are moving on, after many years of service. Allow me to carry the torch and bring what I have learned from their leadership to the office of Vice President.

The past three years have presented many challenges. I have learned a great deal about union governance, our labour laws, the bargaining process, and the needs of our membership. As Chair of the Mental Health and Addictions committee, I continue to advocate for mental wellness by recommending workshops, townhalls and supporting initiatives presented to the AFC, MBT and AFBS.

Increased resources from Canadian funders to support BC created productions, in addition to forging stronger international relationships is another priority.

We need a strong, informed and solution focused board in place to support the negotiation team and staff. Having worked as a Site Manager and Counselor in Mental Health and Addictions for over 12 years, I have team management experience and specialize in crisis intervention. I offer myself as someone who listens, takes time to research and seeks calm approaches to decision making. I will serve the management team well.

I have worked as a principal actor, VO artist, stand-in, BG, stunt and mocap performer. I understand your struggles. All one in Solidarity.
